ADVICE TO CORRESPONDENTS.

Correspondents will greatly oblige by observing, as far as possible, the following regulations.

All orders should be legibly written out in a list, and not mixed up in the body of the letter. This will save much trouble, and at the same time prevent mistakes.

The names of every thing should be plainly written.

In ordering Fruit Trees, it should, in all cases be stated whether the Standard or Dwarf trees are wanted.

Where particular varieties are ordered it should be stated whether, and to what extent, other varieties may be substituted, or when varieties are ordered Dwarf, if the same varieties may be sent Standard, or vice versa, in case the order cannot be filled to the letter.

All Trees and Plants are carefully labeled and packed in the best manner, under the direct supervision of the proprietors, for any part of the United States, for which a moderate charge is made, sufficient to cover the cost of material.

It is requested that explicit directions for marking and shipping packages accompany each order, and where it is left to our judgment, will forward by the best routes; but, in all cases the packages will be at the risk of the purchaser after being shipped. For loss or detention claims must be made on the forwarders.

It is advisable to make remittances by check, draft, or post-office order.

Small packages can be sent by Express C. O. D.

Orders sent by mail will be promptly filled.

Persons unknown to the proprietors are expected to accompany their orders with Cash, or satisfactory reference.

S. S. JACKSON & CO., Cincinnati, Ohio.

- Douglasii.  Rosy pink........................................... 25
Opulifolia Aurea. A fine variety, with large golden yellow tinted foliage, very conspicuous. 25
Revesii or Lanceolata. Has clusters of pure white flowers in May... 25
Revesii, fl. pl. Double, very beautiful.......................... 25
Kamoun. Flowers much like the heliotrope, fragrant.................. 25
Prunifolia, fl. pl. Plum leaved flowers, like white daisies, blooms in May... 25
Exemia. Rose colored, small........................................ 25
Assorted varieties, our selection, per 100, $10.00.

Syringa Lilac. Well known, early blooming shrubs of most delightful fragrance.
Josika. Josika’s late flowering, violet............................... 50
Vulgaris. Common purple lilac........................................ 25
Alba. White......................................................... 25
Charles X. Dark purple, small...................................... 25

Tamarix. Tamarisk Tree. Slender growing shrubs with small leaves, more like a delicate juniper or arborvitae, than a deciduous plant; flowers, a delicate rose.
Indica................................................................. 25
Eteranda.............................................................. 25
Narbonne............................................................. 25

Tilia. Linden or Basswood. Handsome shade trees, suitable for street or lawn.
Americana. American Linden........................................ 25 to 50
Europea. European Linden........................................... 25
Alba. White leaved.................................................. 25
Alba Pendula. A splendid drooping variety, worked six to nine feet... 100

Ulmus. Elm. Ornamental trees that grow rapidly in rich soil.
Americana. American elm............................................. 50

Viburnum Opulus. Snowball. An early flowering shrub, with large clusters of ball shaped white flowers........................................ 25
Oxyoccus. Tree cranberry.............................................. 25

Weigela. A class of comparitively new ornamental flowering shrubs from China; of free growth and profuse flowering qualities; rich additions to our hardy shrubs. The following comprise nearly all that have yet been introduced:
Amabilis or Splendens. Fine strong grower, flowers deep rose......... 25
Amabilis Alba. Flowers white, changing to a delicate blush, foliage a light green................................................ 25
Arboerea Grandiflora. Fine large flowers................................ 25
Arborescens Versicolor. Changeable, white to blush......................... 50
Florabunda. Deep purplish crimson, a free bloomer........................ 50
Desboisi. Flowers deep rose, vigorous grower................................ 25
Groenewegeni. Blush and red........................................ 25
Hortensis Nivea. The purest white, admirable for forcing.............. 50
Isoline. Flowers clear white when first open, changing to blush..... 25
Multiflora. Profuse flowering.............................................. 25
Rosea. Rosy blush.............................................................. 25
Rosea. Nana Var. A new dwarf variety, quite distinct.............. 50
Van Houtii. Flowers carmine................................................ 50
Vershaffelti. Strong, robust grower of profuse flowering qualities, both in Spring and Autumn.............................................. 25
Folis Variegata. Variegated leaves bordered with yellow and white flowers, bright pink, a very desirable variety............................... 50
Climbing and Trailing Shrubs.

BIGNONIA GRANDIFLORA. Chinese Bignonia. Fine for covering walls, stems of trees, etc. 50

CLEMATIS. Virgin's Bower. Beautiful flowering plants, suitable for any situation where climbers are required, perfectly hardy.
- Azurea Grandiflora. Large blue, Chinese virgin's bower 50
- Flammula. Sweet scented 50
- Sophia, very showy, pale blue 1 50
- Sophia, flora pleno 1 50
- Languinosa. Pale blue, very large 1 00
- Viticella Venosa. A rich purple 50
- Fortunii. Fine flowers 1 50
- Helena. Flowers very large white, with yellow stemans, distinct and fine 1 50
- Montana. A rampant grower 1 00
- Monstrosa 1 00

GLYCINE. Rapid growing climbers with attractive flowers, which hang in pendulous racems, fine for trellis work and arbors.
- Sinensis. Large flowered, Chinese, blue 50
- Sinensis Alba. Large white flowered 1 00
- Magnifica. Flowers in dense racems of a pale lilac, vigorous grower 50

HUMULUS LUPULUS. The Hop Plant of Commerce. Makes a fine covering for Arbor or Trellis 25

HEDRA. Ivy. Hardy evergreen creepers, adapted for covering walls, out buildings, or trunks of trees; requires rich soil and shade, and when once established, grows luxuriantly.
- Hibernica. Irish ivy 25
- Variegata Aurea. New variegated leaved variety 50

PERIPLOCA GRÆCA. Virginia Silk Vine 25

LONICERIA. Honey suckle. Known all over the world for its delightful fragrance; rapid climbers, grow in any soil, or situation.
- Belgica or Monthly Fragrant. Blooms all summer 25
- Aurea. Yellow trumpet, monthly 25
- Sempervirins. Scarlet trumpet, monthly 25
- Aurea Reticulata. Japan, golden leaved 25
- Fragrantissima. White, very fragrant, small 25
A number of the Evergreens are grown in pots, particularly the new or rare varieties. They can be transplanted at any time during the Summer.

**ALBIES. The Spruce Fir.**

- Alba. American white spruce, a very handsome tree of free compact growth, easily distinguished from the norway spruce as the foliage lies closer to the branchlets, comes on only about an inch long. 50 to 3 00
- Canadensis. Hemlock spruce, a beautiful tree with drooping branches, light green feathery foliage. 25 to 1 00
- Douglassii. Douglas fir, of symmetrical and dense foliage, *in pots* .... 50

**Excelsa. Norway Spruce.** A lofty elegant tree of great diversity of habit, some very compact, others quite pendulous, especially when they attain the hight of 15 or 20 feet, an indispensable tree for City or Country ......................... 25 to 2 00

**AUCUBA. Japan Gold Dust Tree.** A beautiful shrub with large shiny gold blotched foliage, requires slight protection in Winter, all the varieties are grown, *in pots*.

- Himalaica. Large, green, shiny foliage .............................................. 1 00
- Japonica vera. Dark green fruiting ..................................................... 1 50
- Maculata Mascula. Profusely spotted ................................................. 2 00

**BUXUS. Box Tree.**

- Arborences. Tree Box ................................................................. 25 to 50
- Sempervirens. Dwarf box for edging walks, etc. .................. per yard ........ 25

**CEDRUS. Trees of gigantic habit, require well drained soil to grow in perfection, and slight protection of evergreen boughs to guard it from the Sun in Winter until it becomes established.**

- Atlantica. African silver or Mt. Atlas cedar, *in pots*, per foot in height ................................................................. 1 00
- Deodora. Deodar or Indian. One of the most elegant of all evergreens; foliage light bluish or glaucous green; hardy, if in a northern exposure; *in pots*, per foot in height ....................... 1 00

**CEPHALOTAXUS. Japan Yew Tree.** Valuable additions to our hardy evergreen shrubs, and likely to become popular when better known.

- Fortunii. Fortunes, male yew, one to two feet ............................ *in pots* ........................... 1 50
- Japonica. Strong erect grower .......................................................... 50 to 1 00
- Drupacea. Plum fruited. Fortunii femina of some .................. *small plants* .... 25

**CRYPTOMERIA. Japan Cedar.** A graceful pyramidal tree with drooping branchlets; considered quite hardy; requires a dry subsoil ................................................................. 25 to 1 00
CUPRESSUS. Evergreen Cypress. Many varieties of this interesting class of plants are perfectly hardy in this latitude. They are best planted, as single specimens, or on the margin of walks.

Goweniana. Gowen’s cypress. Very delicate green foliage, from Northern California; hardy south of here. 50 to 1

Lawsoniana. A California evergreen, of recent introduction, of exceedingly graceful habit, and perfectly hardy; fine for cemeteries. 50 to 1

Lawsoniana Stricta. A handsome erect growing variety of the same. 50 to 1

Lawsoniana, Reid’s tipped. Quite distinct when the young growth starts in Spring. 1

Pyramidalis. A pretty erect growing little tree; not quite hardy here in pots, two feet 25 to 1

Funebris. Weeping or funeral cypress of China; a beautiful weeping evergreen; not considered quite hardy here. in pots, two to three feet. 25 to 1

McNabiana. Glauca, handsome foliage, said to be perfectly hardy. In pots. 50 to 1

Thyoides Variegata. Variegated white cedar, distinctly marked with white and yellow dots and stripes, perfectly hardy. 25 to 50

Nut Kaensis. Nootka sound Cypress (Thujaopsis borealis). One of the finest of our perfectly hardy evergreens, of a glossy glaucous green, retains its color well during the Winter, will no doubt become very popular when better known. 50 to 1

EUONYMUS Evergreen Chinese Spindle Tree. Beautiful dwarf evergreen shrubs that require slight protection here; some of the varieties make pretty edging that, when covered slightly with leaves, proves perfectly hardy; all are grown in pots and can be transplanted at any time.

Japonica. Large leaved variety. 25 to 50

Aurea marginata. Golden edged and striped. 25 to 50

Latifolius Alba Marginata. The finest of all the large leaved, white, variegated Euonymus. 50

Radicans folis variegata. A new creeping variety with silver variegated foliage, fine for edging. 25 to 50

Radicans folis rosea marginata. Rose margined, habit like the preceding. 25 to 50

Japonicus fol argentesus. Silver striped leaved. 25 to 50

Pulchellus. A very pretty exceedingly dwarf variety, with narrow, dark green, shiny leaves. 50

ILEX AQUIFOLIUM. European Holly. Requires a shaded situation.

JUNIPERUS. Indispensable shrubs or small trees, natives of all climates, of great diversity of form and color, were much esteemed amongst the ancients, grows in almost any soil or situation.

Drupacea. Plum fruited, a rare species from Syria, has proved perfectly hardy. 1

Echiniiformis. Hedge hog or globular juniper, a curious little plant as its name implies, stands our severest Winters, small. 50
Excelsa (true) Tall Juniper. A fine handsome upright growing variety with silvery glaucous foliage that generally proves hardy, fine plants........................................ 2 00
Ericoides. Heath like, (not retinispora) a very distinct dwarf shrub, perfectly hardy.................................................. 25 to 50
Fragrans. Its very graceful, silvery, glaucous foliage, and general beauty of outline, make it one of the most desirable of the family, quite hardy............................................................ 1 00
Hibernica. Irish Juniper; an erect growing, fine variety of dense compact habit; resists our severest Winters.
One foot ................................................................. 25
Two feet........................................................................ 50
Five feet. Fine compact plants........................................ 3 00
Six to eight feet. Splendid plants..................................... 5 00
Rigida. Weeping or rigid leaved, a rapid growing, very handsome tree.......................................................... 1 00
Repens or Prostrata. A hardy creeping variety, spreads along the ground in wide circles forming a complete mass of rich green verdure.............................................................. 25 to 50
Sinensis Argentea. Chinese silver leaved, a beautiful silver foliaged variety.
Suecica nana. Dwarf Sweedish variety. small, in pots .......... 25
Sabina. The savin.............................................................. 25 to 50
Sabina Variegata. A very distinct and prettily marked variety, quite as hardy as the common savin.......................... 75
" Tamiriscifolia. Tamarisk leaved creeping savin.............. 50
Tripartita. A new, delicate, glaucous tinted foliaged variety, perfectly hardy, in pots, small........................................ 50 to 1 00
Squamata. Scaled juniper.................................................. 1 00
Virginica. Virginia red cedar........................................... 25 to 50

MAGNOLIA GRANDIFLORA. Southern, large flowered magnolia.
in pots, small.................................................................. 50

MESPILIUS. Pyracantha or Evergreen Tree. Bears orange scarlet berries, makes a very ornamental hedge, or fine as single specimen................................................................. 25
Alba. White berried, very distinct dwarf variety, small, in pots...... 25

MAHONIA. Probably the finest evergreen shrubs that resists our winters; beautiful foliage, and bright yellow flowers in early Spring.
Aquifolia. Purplish shining foliage...................................... 25 to 1 00
Fasicularis. Cluster flowered, much like the preceding........ 30 to 1 00
Japonica. A large leaved, splendid variety............................. 1 00
Intermedia................................................................. 1 00
Beallii. Has golden veins and edge, beautifully marked.......... 1 00
The last three have proved perfectly hardy with us.

PICEA. Ralsam Fir. Grows luxuriantly in rich, moist soil.
Pectinata. English silver fir........................................... 25 to 3 00
Cephalonica. Black silver fir, in pots.................................. 50 to 1 00
Jackson's Nurseries.

Apolonis. Apolls silver fir, in pots.............................. 50 to 1 00
Nordmaniana. Asiatic, in pots........................................ 50

PINUS. The Pine. For ornamental purposes they cannot be surpassed, forming magnificent conical trees; are suitable for planting in any situation.

Austrian or Black Pine.............................................25 to 1 00
Cembra. The cembrian Pine.........................................1 00
Excelsa. The Bhotan Pine...........................................1 00
Mugus. Mugo, dwarf Pine........................................... 75
Ponderosa. Heavy wooded Pine, in pots............................1 50
Strobus. White or Weymouth Pine.................................25 to 50
Sylvestrus. Scotch Pine, or Fir....................................25 to 50

RETINISPORA. New Japanese Evergreens, entirely distinct from any other class of small evergreen trees, of easy cultivation, and we think will prove generally hardy. They are all grown in pots, and principally small plants.

Ericoides. Heath-like..................................................25 to 50
Leptoclada. A beautiful dwarf growing variety..................
Lycopodoides. Graceful, feathery-like habit........................1 00
Obtusa. Branches spreading and drooping, foliage bright green above and silvery glaucous below; will prove a great acquisition to our hardy evergreens....................................................
Pisefera aurea. Slender dense foliage of upright growth, golden tipped; one of the most beautiful new evergreens, in pots...50 to 1 00
Plumosa. An elegant small evergreen shrub.............................................
Squarosa. A pretty little species, with glaucous green foliage, in pots.1 00

TAXUS. The Yew. A genus of much esteemed plants, of peculiar tint and foliage; much admired and very appropriate for cemetery planting.

Adpressa. From Japan, dark green.................................1 00
Baccata. Common, English yew.......................................2 5
Elegantissima. Upright, silver variegated. The young wood in Summer is of a most beautiful golden hue......................50 to 1 00
Variegata Aurea. Golden variegated Yew..............................1 00
Fastigiata or Hibernica. Irish upright Yew..............................1 00

THUYA. Ornamental plants that form desirable specimens, and are useful in forming screens and hedges; bear the knife or shears to any extent; plants become very dense, and will grow in most any soil.

Cristata. Coxcomb leaved. A new distinct variety...small, in pots.... 50
Gigantea. (Nuttal.) Gigantic Arborvitea of California. A beautiful new evergreen that proves generally hardy; it is very much esteemed in Europe; fine plants.............................1 50
Globosa. Globe Arborvitea. Remarkably globular shape, very dense and dwarf in growth; originated at Philadelphia...small, in pots..........................50 to 1 00
Densa. A dense growing dwarf variety..............................in pots.... 25
Gigantea Glaucua. Glaucous leaved........................................
Hoveyii. Foliage of bright yellowish green, compact and fine form..........................25 to 1 00
Occidentalis. American Arborvitea. A well known species, much used for hedges.......................... 25 to 50
Plicata, or Nees Arborvitea.......................... 25 to 50
Reedii. An exceedingly graceful globular shaped variety............. 25
Wareana. Wares, or Siberian Arborvitea, of a regular conical form, peculiar dark green foliage, dense habit and perfectly hardy, one of the best..................................................25 to 1 00
Menzesii (Gigantea of Hook). A large arborvitea of beautiful habit, 25
Macrocarpa. A strong grower, from Oregon, small, in pots............. 25
Tom Thumb (E. & B.) A very dwarf variety, resembles a dwarf Cypress while in its young state, will prove valuable for edging where Box will not grow................ 25 to 50

Thuys of the Chinese type have been separated from T. Occidentalis and its species, and classed as Biotas. The following are the most worthy of cultivation.

BIOTA ORIENTALIS. Chinese Arborvitea.
Aurea. Golden Arborvitea. Form compact and globular, of a lively, yellowish green color; one of the best of its class...................50 to 2 00
Aurea variegata. A most distinct and beautiful variegated variety. Rich golden foliage shaded down to white, tipped with pink; proves perfectly hardy; one of the handsomest variegated plants.
Aurea Elegantissima. A beautiful new variety; resembles the golden, but more dwarf in its habit—the young branchlets tipped with a lovely golden hue. We believe this variety will prove one of the most valuable new acquisitions to our hardy evergreens...1 00 to 2 00
Japonica. Japan arborvitea. A fine erect grower, of good color......1 00
Compacta. Compact grower...........................................25 to 50
Falcata. A recent introduction from Japan; upright and conical in growth, with elegant foliage, and compact habit; fine large plants..2 00
Filiformis Pendula. Weeping Arborvitea. One of the most grace-ful and pendulous of all hardy evergreens................................2 00
The following collections is more select than extensive, the aim being to keep only those that are distinct in flower, form or foliage. A number of the varieties are grown in pots, for which orders can be filled at any season of the year. Parties leaving the selection to us may rely upon getting choice varieties.

ZONALE GERANIUMS.

JACKSON’S NEW SEEDLINGS.—The set of seven being the choice of fourteen hundred hybridized seedlings, which excited the admiration of all who have seen them the past two years. A number of Prominent Florists acknowledge them to be by far the finest in form, color and habit, of any yet introduced.

CONQUEROR.

Deep rose shaded carmine; fine large compact truss, perfect in form until fully expanded; a profuse bloomer in Autumn, and the best winter blooming variety we have seen. Price $1.00.

QUEEN OF THE WEST.

Deep orange scarlet; fine, large individual flower; very compact, extra form; seeds sparingly; beautiful zone, and dwarf habit. Price $1.00.

HEBE.

White, with carmine center; flower of great substance, color does not run, as is the fault with many of this type; fine free grower, foliage beautifully zoned.

GENERAL SHERIDAN.

Brilliant crimson, of dwarf habit; large trees, excellent for pot culture. Price $1.00.

PET.

Exceedingly dwarf; color rosy salmon; flowers when two inches in height; a veritable lilliput; good winter bloomer. Price $1.00.

ANNIE LEE.

Violet rose; very distinct in color; good bloomer; a fine variety. Price $1.

MRS. WILSON.

Rich crimson scarlet; very compact truss, and fine habit; a good winter variety. Price $1.00.

Will be ready to send out May 1st.

The following varieties are $3.00 per dozen, except where noted.
